

MIA CARRILLO

Orlando, FL • (239) 326-1184 • miacarrillobusiness@gmail.com

recruapp.com • mialc.github.io/mia-portfolio • github.com/mialc • linkedin.com/in/mialcarrillo

Full-stack developer and founder of Recru LLC, a live iOS app on the App Store backed by Firebase, Cloud Firestore, and Cloudinary. Builds responsive front ends with HTML, CSS, Bootstrap, and JavaScript, and ships production features fast using AI-assisted development workflows. IT student at UCF with research experience benchmarking LLM inference energy and a strong project management and leadership background.

EDUCATION

University of Central Florida — Bachelor of Science, Information Technology / *Expected Graduation: Spring 2027* • Orlando, FL

SKILLS

Front-End: HTML, CSS, JavaScript, Bootstrap, WordPress, responsive design, accessibility

Back-End & Data: Firebase, Cloud Firestore, Cloudinary, MySQL, PHP, AWS

Programming & Tools: Python, C, Java, C#, Git/GitHub, VS Code, Unity

AI & Product: AI-assisted development (LLM pair-programming, prompt-driven workflows), LLM evaluation and benchmarking (Ollama, CodeCarbon), Figma, wireframing, UX research, user interviews

Project Management: Agile workflows, sprint planning, stakeholder communication, iterative development

PROJECTS

Recru — Founder & Developer, Recru LLC / *Live on the App Store* • recruapp.com • *Firebase, Firestore, Cloudinary*

- Founded Recru LLC and designed, built, and launched a live iOS app that helps students navigate sorority recruitment — owning design, development, App Store releases, and the recruapp.com site
- Built and maintain the full stack solo — iOS front end, Firebase / Cloud Firestore backend, and Cloudinary media handling — architecting end to end and co-developing with AI coding tools while reviewing, testing, and integrating all code
- Grew the user base well ahead of the prior year by partnering directly with university Panhellenic councils, including UF, USF, and SDSU, to promote the app to incoming students
- Run all ongoing development, user research, and growth planning as the only person building the product

Local-First LLM Router — Research Project / *Python, Ollama, CodeCarbon*

- Designed and built an experiment pipeline that measures when a small on-device LLM (Llama 3.2 1B) can answer in place of a cloud model, with real hardware energy measurement on every query
- Built a three-model LLM judge panel for quality scoring; found and fixed six instrumentation bugs before reporting results
- Produced reproducible findings on unreliable model-confidence routing signals and the hidden energy cost of escalating queries from device to cloud

EXPERIENCE

Front-End Web Development Intern — U.S. Hunger / *Longwood, FL* • *May 2026 – Present*

- Build responsive, on-brand web pages using HTML, CSS, Bootstrap, and JavaScript
- Designed and built a portfolio site as a Phase 2 project deliverable
- Developing WordPress themes with PHP and MySQL and deploying sites on AWS

Software Engineering Intern — Zuleris Interactive / *Orlando, FL* • *February 2025 – May 2025*

- Built interactive UI systems for a military signal-identification trainer using Unity & C#
- Created modular prefabs and animation controllers, reducing future screen development by 30%
- Presented sprint demos, gathered usability feedback, and improved interface clarity

Student Assistant (Federal Work-Study) — UCF L3Harris Engineering Center / *Orlando, FL* • *August 2024 – Present*

- Coordinated intake and distribution of senior-design parts and equipment for 50+ project teams
- Maintained communication between vendors and students; supported inventory and facility events

LEADERSHIP & ORGANIZATIONS

Vice President of Recruitment, UCF Panhellenic (2026 – Present)

- Led and executed a large-scale formal recruitment process serving 800–900 potential new members and 1,900+ active sorority members; oversee recruitment operations across 12 chapters

UCF Upstarts Venture Incubator Program (2026 – Present)

- Developed and refined Recru with mentor and cohort; placed 17th of 60+ teams (top 25%) in the UCF Joust competition and served as a semifinals alternate
